Notes

*1. Products are tested and binned at a transient forward current (IF) with 1000mA. With the use of different IF, it may probably cause differences in CCT & forward voltage. Generally, with the increase of IF, the CCT will be raised as well.

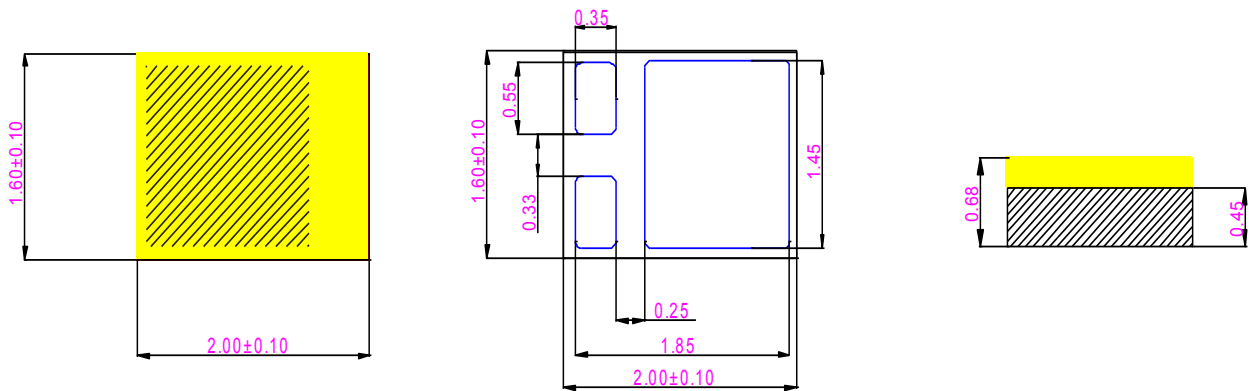

1000mA

2. Tolerance of ± 0.005 on x, y coordinates.

± 0.005

Typical Optical/Electrical Characteristics Curves ($T_a=25$ Unless Otherwise Noted)

Package Dimensions

Notes :

1. All dimension units are millimeters.
2. All dimension tolerance is ± 0.1 mm unless otherwise noted.
 ± 0.1

Welded plate and steel mesh Dimensions

Notes :

When the circuit configuration is not affected, suggested the increase in the middle of the copper area, or the connection between the middle and the pad and the negative electrode can improve the cooling performance of the product.
